

Acora Acoustics

# SRC-1

2-Way Loudspeaker

**-HEAR THE TRUTH-**

Acora Acoustics

# SRC-1

2-Way Loudspeaker

Every now and then, you come across a product that not only offers world class performance, but is visually stunning as well.

The SRC-1 is one such product. Acora uses premium components fitted into a gorgeous all granite enclosure. Granite is utilized to build the enclosure for its sonic benefits, but the high gloss polished finish provides a timeless, low-maintenance look of luxury.

The design of the SRC-1 provides an immersively large sound stage, but does so in a relatively small footprint. The granite enclosure assures you get every bit of detail from the specially modified premium drivers. This results in astounding imaging.

Have a listen, we believe you will find them as wonderful to listen to, as they are pleasing to look at - one of those rare combinations of performance and beauty.
